SUMMARY

Accomplished Full Stack JavaScript Developer with 7+ years of experience designing, developing, and managing complex web applications. Proven expertise in Vue.js, React, Node.js, and Agile methodologies, with hands-on experience building GenAI-powered features using LLM orchestration, Retrieval-Augmented Generation (RAG), and the Model Context Protocol (MCP). Demonstrated ability to lead cross-functional teams and deliver high-quality solutions within tight deadlines.

SKILLS

Core Development	JavaScript / TypeScript, React.js, Vue.js / Nuxt.js, Angular, Node.js, MongoDB / MySQL, Redis, Microservices
AI / GenAI Engineering	LLM Integration (Claude API, OpenAI API), Prompt Engineering, RAG (Retrieval-Augmented Generation), Model Context Protocol (MCP), Multi-Agent Orchestration
Cloud & Tools	AWS, Git, CI/CD

WORK HISTORY

Sr Software Engineer, Webuy Entertainment Pvt Ltd.	2024/Present
- Developing and maintaining the dynamic website and web applications using VueJS, NuxtJS - Developing & maintaining highly efficient production-level code and prototypes with an instinct for reusability - Participating in design, testing phase & successful delivery of the SDLC - Coordinating with co-developers and other related departments - Communicate effectively with project managers, technical leads, internet strategists, and other internal team members - Involvement in the project and sprint planning	
Software Developer Associate, LRN Technologies & Content Solutions	2021/12 - 2024
- Participating in the development, testing, and deployment phases of the Catalyst Design product, ensuring adherence - Collaborating with senior developers and cross-functional teams including quality assurance (QA) teams to ensure a comprehensive understanding of software requirements, facilitating the development of high-quality software solutions - Writing clean, maintainable, and efficient code - Actively debugging and troubleshooting issues in the existing codebase, identifying and implementing solutions to enhance software functionality	
Sr Software Developer, OSP Labs	2017/6 - 2021/11
- Led brainstorming sessions to introduce creative ideas that enhanced software design and functionality, contributing to the overall success of various projects - Utilized version control systems such as Git to effectively manage the codebase and collaborate with team members - Evaluated and integrated third-party libraries, frameworks, and APIs to accelerate software development processes, optimized efficiency and performance	

FEATURED PROJECT

AgentCore — Multi-Channel, Multi-Agent AI Platform	(Company Dev Day)
<i>Node.js/Express, Google Gemini, PostgreSQL/pgvector, Vue 3 — powering a live e-commerce shopping assistant and an internal log-diagnostics assistant.</i>	
- Architected a multi-agent orchestration backend with a plugin-style agent loader that dynamically registers agent configs, tool schemas, and RAG namespaces at boot — enabling new agents without backend code changes. - Built a channel-agnostic adapter (AG-UI protocol) so one engine powers both a customer-facing shopping assistant and an internal log-diagnostics assistant through a unified streaming API. - Integrated Google Gemini function-calling with per-agent tool allowlists and a PostgreSQL/pgvector RAG pipeline to ground agent responses in policy documents and product data. - Implemented security guardrails — prompt-injection/jailbreak detection and automated PII redaction — plus centralized Grafana Loki logging with a natural-language log-query agent for engineers. - Built a framework-agnostic embeddable chat widget and a Vue 3 storefront frontend, owning end-to-end delivery across all 4 services (agent backend, store backend, widget, frontend).	

EDUCATION

Mumbai University (Viva College) — Bachelor of Science in Information Technology	2012 - 2015
---	-------------

CERTIFICATIONS

- Javascript Security — Infosec
- AWS Cloud Technical Essentials — AWS
- Architecting Solutions on AWS
